

GSC FIELD APP INSTALLATION

TABLETS

Enabling developer mode

- Go in the setting and write « deve » in the search engine and select “For Developers Setting” option.
- Select “Developer Mode” instead of “Windows Store App” as the way to install applications. **This part requires an internet connection.**

Installing

1. Select the file named **Add-AppDevPackage.ps1**
 - a. Install with PowerShell (right-click or let your finger on the file to open the options)
 - b. Follow on-screen instructions.

Updating

Refer to install procedure.

Reset

- Inside application, go to the settings.
 - Navigate to “About” menu
 - Double tap/click on GSC icon on your right. A message should pop asking for a factory reset of the application.
 - If “Yes” is selected, the working database will be copied at your desired location.
 - On restart the application will ask to create a new field book.
