

GSC FIELD APP INSTALLATION

TABLETS

Downloading the installation ZIP file

1. Go to the GitHub website (<https://github.com/NRCan/GSC-Field-Application>)
2. Click on the Latest version in the Releases section on the lower right side of the screen

3. Download the ZIP file as either 64-bit (x64) or 32-bit (x86). We recommend 64-bit for modern hardware.

Enabling developer mode

1. On the tablet, go in the Settings and type « deve » into the search engine and select “For Developers” option.
2. Select “Developer Mode” instead of “Windows Store App” as the way to install applications. **This part requires an internet connection.**

Installing

1. Select the file named **Add-AppDevPackage.ps1** and right-click (long tap)
 - a. Install with PowerShell (right-click or let your finger on the file to open the options)
 - b. Follow on-screen instructions.

Updating

Refer to install procedure.

Reset

- Inside application, go to the settings.
 - Navigate to “About” menu ○ Double tap/click on GSC icon on your right. A message should appear asking for a factory reset of the application.
 - If “Yes” is selected, the working database will be copied at your desired location.
 - On restart the application will ask to create a new field book.
